

Print binary tree leaf nodes (Preorder Traversal)

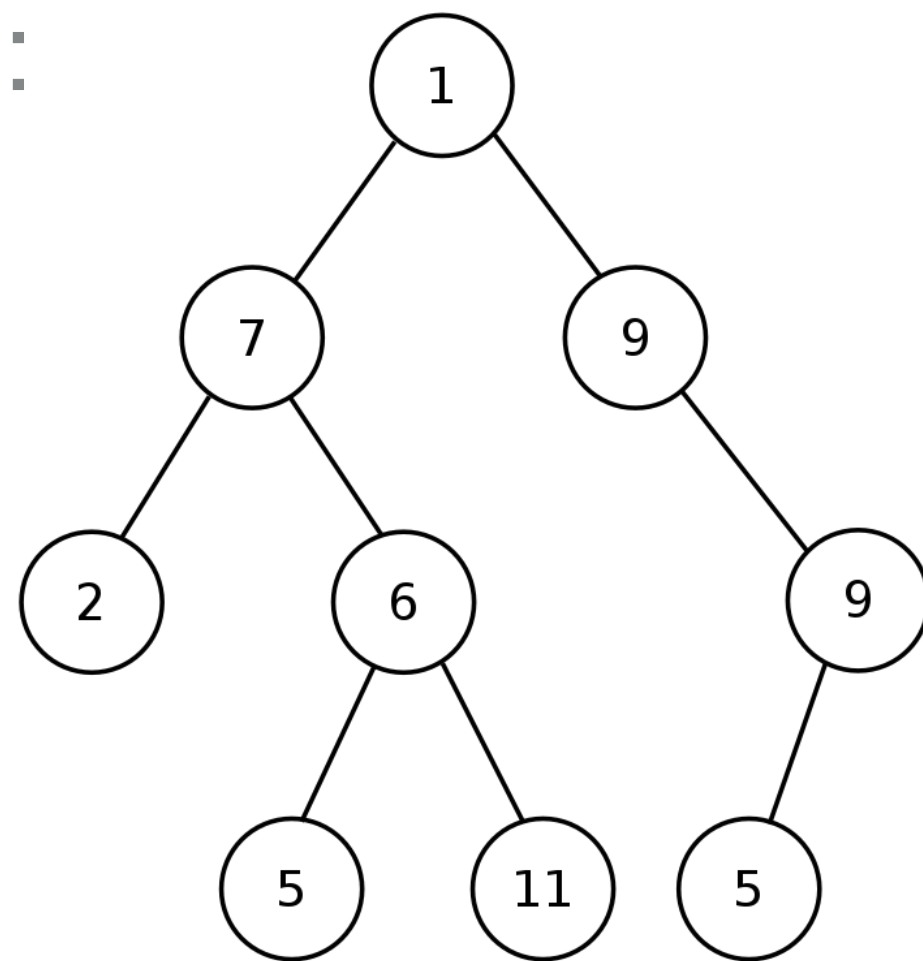

Challenge name: binary-tree-preorder-traversal

Description:

Given a [binary tree](#) print all of its leaves using [preorder traversal](#). Generate the class/object to manage nodes and use a recursive function to do the preorder traversal.

Example

Input tree:

Output: 1, 7, 2, 6, 5, 11, 9, 9, 5

After completing the challenge please submit it in this [form](#).
